Subject: TDI Power Launches New Dynaload XBL Water Cooled Series

Hackettstown, N.J. – February 2, 2009

TDI Power is proud to add a water cooled unit to the XBL series of electronic loads. The XBL H20 Dynaload Series features 12 KW Master and 12 KW Slave models with wide range voltage inputs and sophisticated computer programming via GPIB, Ethernet, or RS232. These units feature an integrated web page for local system operation and control. This product is an ideal choice for testing power supplies, batteries, fuel cells and DC Power Sources.

All models offer master/slave parallel capabilities and closed box calibration.

Higher power models incorporate variable speed forced air cooling to assure a quiet environment.

Features include:

- 16 bit resolution offering greater accuracy
- Close case calibration minimizing downtime and cost
- Remote monitoring via Ethernet, Telnet and Web Browser
- High Speed Programmable Slew Rate
- Fault tolerant MOSFET modules

TDI Power is a global manufacturer of Power Systems Solutions for the Computer/Networking, Telecommunications, Military/Aerospace, Medical and Industrial markets. We have the broadest range of high technology power conversion products available in the marketplace, including DC and AC Power Systems, Power Supplies, Rectifiers, Converters and accessory equipment. Established in 1960, TDI is headquartered in New Jersey, has over 1000 employees and four facilities located throughout the world. For more information about TDI go to www.tdipower.com.
